**Subject: M/035/0002 – Bingham Canyon Mine
Notice of Activity – BCM Site Establishment**

RECEIVED

JAN 17 2014

DIV. OF OIL, GAS & MINING

Dear Mr. Baker:

This letter serves as notification of new activities at the Bingham Canyon Mine. Kennecott Utah Copper LLC (KUC) is performing site establishment activities in support of mining activities. Site establishment activities include the following:

1. Preparation of a combined contractor job trailer yard, parking area and laydown yard;
2. Preparation of a tank yard containing petroleum storage tanks and a construction water surge tank;
3. Installation of ~14,000 linear feet of HDPE pipe to supply the construction water surge tank.

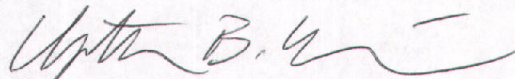

Figure 1 illustrates the location of the activities in relationship to Bingham Canyon Mine. The three activities will disturb approximately 14 acres of primarily previously disturbed ground that is currently reclaimed, agricultural or roadway. Approximately 30,000 yd³ of barrow material will be used to provide fill for the tank yard and will be sourced from an area near the existing waste rock disposal area toe, an area intended to be disturbed by future mining activities.

KUC completed a Class III Cultural Resources Inventory in 2011 for this area. No significant cultural artefacts were identified within the site establishment area. KUC has submitted for the Division's review this inventory in a separate submittal.

The vegetation and top soil for activities 1 and 2 listed above will be cleared and stockpiled adjacent to the site locations for use once the sites are reclaimed. In the interim the stockpiles will be seeded using a seed mix of native grasses.

Please contact Zeb Kenyon (801-569-6035) should you have any questions concerning this submittal. Thank you and your staff for your continued support.

Regards,

Chris Kaiser
